

TRUMP SIGNS 5-WEEK PPP EXTENSION

From the *Journal of Accountancy* by Jeff Drew

President Donald Trump signed a bill Saturday, July 4 re-opening the application window for the Paycheck Protection Program (PPP) until Aug. 8.

The five-week extension had been approved last week by both chambers of Congress. The U.S. House of Representatives and the Senate both passed the legislation by unanimous consent.

The House's approval on July 1 came after the Senate passed the extension in a surprise move the night of June 30, just a few hours before the PPP application window was scheduled to close.

The extension keeps a source of funding open to struggling small businesses while Congress works on a second, more targeted funding program. The PPP, which has approximately \$129 billion in funding remaining, was launched in early April as the COVID-19 pandemic battered the U.S. economy and forced many businesses to close. The program provides forgivable loans that small businesses and other qualifying entities can use to cover payroll and other select costs.

The U.S. Small Business Administration (SBA), which oversees the program with the Treasury Department, stopped accepting loan applications at midnight on June 30. The program had not yet officially re-opened as of Sunday evening, according to the SBA's [PPP home page](#).

Sen. Chris Coons, D-Del., said in a tweet June 30 that extending the deadline was an important step, and that the next step should be to pass a second round of PPP loans to aid the smallest businesses with the most need.

Sen. Marco Rubio, R-Fla., the chair of the Senate Small Business Committee, said in a tweet that he did not object to extending the PPP deadline until Aug. 8 but that the vast majority of small businesses that wanted PPP funds have already used the program.

"What we really need to pass very soon is targeted help for those who need a second round of aid," Rubio said.

As of 5 p.m. ET on June 30, the SBA had approved nearly 4.9 million loans for a total of more than \$520 billion.
